## Content

[EMC Directory - www.emc-directory.com](http://www.emc-directory.com), the leading website for the EMC testing industry, has published the [first edition of its EMC magazine](#). This inaugural magazine consists of insightful articles, comprehensive product showcases, a detailed directory of EMC testing service providers, and interviews with experts from various companies offering valuable resources for industry professionals. This magazine is available in both print and digital versions.

The printed edition of the magazine will be available at major events, including [Embedded World 2025](#), EMV 2025, EMC+SIPI 2025, and other key events.

The digital edition is now published on the EMC Directory and can be downloaded by clicking [here](#).

The articles published in the magazine are from diverse categories ranging from real-time spectrum analyzers to conducted emissions in a three-phase line, interference emission testing and in-situ EMC testing. Whether you're an industry expert or just intrigued by the topic, these articles offer a thorough understanding of fundamental concepts.

The magazine also showcases state-of-the-art EMC testing products from a multitude of companies across the sectors. From EMC testing software and tables to EMC power amplifiers and shielded enclosures, the magazine covers EMC test equipment from manufacturers including LUMILOOP GmbH, RF SPIN, A.H. Systems and many more.

Additionally, the magazine includes a country-wise directory of EMC service providers, offering a detailed overview of companies that have specialized EMC test labs or excel in emission, immunity, pre-compliance, etc. testing. This directory helps industry professionals identify and connect with reliable EMC testing partners, ensuring their products' compliance with industry standards.

The magazine features interviews with key industry professionals from EMC companies. This edition

has interviews of executives from FORCE Technology, KEMA Labs, and QAI Laboratories, who provide their industry views and key information about their company and product launches. These interviews offer a unique opportunity to learn from the industry's visionaries, helping you stay ahead of the curve and anticipate emerging trends.

Through its comprehensive content, the EMC Directory magazine serves as a valuable resource for staying updated on industry innovations and connecting with key players in the EMC testing sector.

### **About Us:**

**Heading :** About EMC Directory

EMC Directory is a leading global online platform dedicated to the EMC and EMI testing industry. The website serves as a comprehensive directory of EMC testing laboratories, service providers, and equipment manufacturers, making it easy for users to search and compare companies based on location, testing capabilities, and services offered.

In addition to company listings, EMC Directory provides industry news, technical articles, product information, and digital magazines, helping engineers, compliance professionals, and decision-makers stay informed about the latest developments in electromagnetic compatibility.

By connecting manufacturers, testing labs, and solution providers, EMC Directory acts as a central information hub for the global EMC testing community, supporting product compliance, knowledge sharing, and industry collaboration.
