[HYPERLABS](#), Inc. is pleased to announce a new partnership with [miro•sys](#) GmbH, which will now represent HYPERLABS products throughout Germany and Austria.

As a leading supplier of premium RF, microwave, optical, and high-speed technologies, miro•sys provides technical expertise and customer support to engineers, researchers, and system developers across a wide range of industries. Through this partnership, miro•sys will provide local sales support and technical engagement for HYPERLABS' portfolio of ultra-broadband components and test solutions.

The HYPERLABS product portfolio includes components operating beyond 110 GHz, industry-leading 145 GHz solutions featuring 0.8 mm connectivity, and advanced instrumentation such as the TDR11100 Ultra-Broadband Time Domain Reflectometer. These solutions support next-generation RF, microwave, optical communications, and high-speed digital applications.

The partnership expands HYPERLABS' presence in Europe and strengthens its ability to provide responsive local support to customers developing increasingly demanding communications, measurement, and validation systems.

"Germany and Austria are home to many of the world's leading engineering organizations, research institutions, and technology innovators," said Brian Doxey, Executive Vice President at HYPERLABS. "miro•sys' technical expertise and customer-focused approach make them an ideal partner to represent HYPERLABS and support customers throughout the region."
