MUNICH, Germany — September 2026 — PS Electronics Co., Ltd. will exhibit at [electronica 2026 in Munich](#) from November 10–13, 2026, at **Hall A2, Booth 648**.

PS Electronics operates **PCBCool as its digital brand and online service platform** for PCB and electronics manufacturing inquiries. The company exhibits under the PS Electronics name at industry events, while its website, online communications, and visitor voucher requests are handled through PCBCool.

electronica 2026 will take place at Trade Fair Center Messe München. The organizer describes electronica as the world's leading trade fair and conference for electronics, bringing together companies and professionals from across the international electronics industry.

Project Discussions at Hall A2, Booth 648

PS Electronics plans to use the four-day exhibition primarily for face-to-face discussions with customers, engineers, sourcing teams, and other electronics industry visitors.

Visitors with an active PCB or PCBA project are welcome to bring quotations, manufacturing questions, or technical issues to the booth.

Pricing will naturally be part of some of those conversations. With members of the company's management and sales team attending the exhibition, customers can discuss current quotations and upcoming projects directly rather than handling every question through a long email exchange.

Technical discussions will be equally welcome. Visitors may want to discuss a PCB construction, manufacturing limitation, material choice, production problem, or the transition from prototype into repeat production.

The aim is straightforward: if there is a manufacturing issue worth discussing, electronica provides a convenient opportunity to sit down and talk about it in person.

Free DFM Consultation for Visitors

PS Electronics will also offer **complimentary DFM consultations** during electronica 2026.

Visitors can bring Gerber files, PCB layouts, stack-up information, or other relevant project documentation to Booth 648. The team at the exhibition can discuss the project, identify the questions that need engineering attention, and arrange a more detailed review where necessary.

The company's engineering team will remain at its manufacturing base rather than travel to Munich, so a complete engineering review will not be performed at the booth. Projects that require deeper analysis will be passed to the engineering team, with feedback provided after the review.

This arrangement is intended for practical manufacturing questions rather than general capability presentations. A customer may have concerns about a stack-up, want a second opinion on manufacturability, or simply want to understand how another manufacturer would approach the board.

Complimentary electronica 2026 Visitor Vouchers

PS Electronics also has a limited allocation of **complimentary visitor vouchers** for customers and other industry visitors planning to attend electronica 2026.

Anyone interested in attending can email info@pcbcool.com to ask whether a voucher is still available.

The use of a PCBCool email address reflects the company's normal online customer communication: **PCBCool is the digital brand of PS Electronics**, while PS Electronics remains the company name used at the exhibition.

Visitors who receive a voucher can redeem it through electronica's official ticket and registration system. The organizer's Ticket Shop supports both ticket purchases and voucher redemption.

Voucher availability is limited, so visitors whose travel plans are already confirmed are encouraged to request one in advance.

Visitors Are Welcome Even Without an Active RFQ

An active quotation or completed PCB package is not required to visit the booth.

electronica is also an opportunity to meet customers and other people working across the electronics industry. Visitors who want to discuss a future project, ask a technical question, or simply meet the PS Electronics team are welcome to stop by.

The company will also have a selection of small gifts available for booth visitors while supplies last.

PS Electronics at electronica 2026

Event: electronica 2026

Dates: November 10–13, 2026

Exhibitor: PS Electronics Co., Ltd.

Hall: A2

Booth: 648

Venue: Trade Fair Center Messe München

Address: Am Messesee 2, 81829 Munich, Germany

Online brand: PCBCool

Visitor voucher requests: info@pcbcool.com

Website: <https://pcbcool.com/>

The official electronica schedule lists visitor opening hours of **9:00 AM–6:00 PM from November 10–12 and 9:00 AM–3:00 PM on November 13.**

For visitors already planning to attend electronica 2026, Hall A2, Booth 648 will provide an opportunity to meet the PS Electronics team in person, discuss an existing PCB or PCBA project, or bring a manufacturing question that is easier to address face to face.

About Us:

Heading : About PCBCool

[PCBCool](#) is an electronics manufacturing services provider operated by PS Electronics, a Shenzhen-based manufacturer established in 2008. The company provides PCB fabrication, PCB assembly, component sourcing, testing, box-build assembly, and related manufacturing support for customers in industrial electronics, automotive, IoT, medical, and consumer applications.

PCBCool supports projects from prototypes and new product introduction through volume production, with manufacturing resources in China, Malaysia, and Mexico. Its capabilities include multilayer, HDI, rigid-flex, high-frequency and heavy-copper PCBs, SMT and through-hole assembly, inspection and testing, conformal coating, and final product assembly. The company works with customers worldwide, providing engineering support throughout the manufacturing process.
